Grounds for Complaint

For several years we have disputed the meter reading and billing practices of APS. At this time we are hereby submitting proof of erratic/incorrect and possibly self serving meter reading and billing practices by APS at the 260 Café Restaurant located at 803 E Hwy 260 in Payson.

The 260 Café was completely closed and out of business for a period of 15 months see attached. The water and the electric were left on for safety and security purposes only. A new operator took over the operations of the 260 Café on January/ February 2009.

The attached document "the 260 Café Electric Usage extracted from APS billing showing comparisons" shows a consumption/demand & billings according to APS. This information extracted from APS bills show irrational/possibly deceptive practices while providing consumption and demand.

A review of the figures while the restaurant was open and closed demonstrates that it is impossible to consume \$4785.55 worth of electricity for a period of 15 months for the use of a burglar alarm and dusk to dawn light.

At this time APS has threatened to transfer the 260 Café disputed billing to another business entity, the Sterling Int'l Hotel, of which Mr. George Bien-Willner is a partner. We request a full investigation of APS consumption/demand readings and billing practices, and full restitution for all monies overpaid and that the commission sanctions these activities. Also that APS cease and desist attempting to transfer disputed billings to other business entities.
